Rèsumè

My name is Giselle Millan, I'm a junior this year. I'm running for the position to be Vice President of the junior class of 2022. I have been in student council and leadership for 3 years this year, as well as I have been on E-board as Vice President for 2 years. For the position, I think I'm best qualified because I know the run of things in leadership as well as student council. In the years previous to this election I as well got involved with students,talked to one another about certain questions and concerns. We had great communication last year with everyone. The class of 2022 made a voice box for all students to put in their voice about certain things they wanted to change or have feedback on. I feel it's important to get this position because already being in a position so many years you really get the hang of things, which I feel I have. As well as I still want to be a person in my class people look up to, and ask for help, and take feedback and concerns and questions from. Being on E-board is important to me because in the previous years we have gotten to make big decisions on leading the year and how it will go. As well as being part of that really helped to put input and other students' input on things at that time, so we could make fixes or changes to please everyone. For this year, the leadership I'm hoping to bring is collaboration and guidance to students this year, one of our most important years for us juniors. The impact I hope to put on others, is that no matter the group you already formed in, step out of the box and meet new people, get close with one another and build friendships with each other. Pursuing this position is taking on a lot of responsibility for me and other leaders, as well as holding my positions for the years I did is a very successful way in moving towards trying to help and make a guidance for others to follow. In years previous, going to states, all the student council meets, and E-board meetings have pushed me to think more about the importance of the year and others' influences on each other. Being able to be in leadership has helped my position in previous years substantially because I could use that time with the president of the class to be able to gather thoughts or questions and feedback to give back to the students, and communicate with them. Having that hour helps us get input,votes, tallying, information across to others, and campaigning anything easier and assessable.
