

Madison Ellis
Sophomore
2017

My name is Madison Ellis, and the position I am applying for in the student council organization is the sophomore vice president for the amazing class of 2020.

I have had one years length of experience in the student council organization. I have also fill the position as the freshman vice president for the year of 2016-17.

Myself being a very organized and a responsible person, I think that I would fill the vice president position to its fullest potential. I am a very good leader and can help in the process of guiding the 2020 class to perfection. I am always giving my time to others, I love seeing everyone having a good time with their peers. Being that I am responsible, I am always on time and know how to get things done. As I start my journey into being a student council leader, I would like to have everyone involved and wanting to better our school events and activities.

I feel it is important for me to have the the vice president role in student council, because I find happiness in knowing that I did something that made everyone have fun and enjoy spending time with their peers. Having this position will allow me to come together with the other elective board members and make events happen. Putting events together and being apart of the student council will help me find pride in what I do for others and be there to help out the student council as much as I can.

A few new things that I can bring to the student council board in the vice president role is to help lead the group through an amazing year. Being a board member won't make me any different from the other members in student council because we will all be working as a team to be productive. I want to impact the student council by making the organization stronger. A way we can achieve that is by getting students to work with others and build up that strength. I have always wanted to be able to take control and do special things with it, so being on the board will help me accomplish that. I want to experience high school to its fullest and make it the best time we can have and I along with the rest of the student council can make that happen.

There aren't many qualifications that I acquire, but I am willing to expand my horizons and make changes to be better for our school community!
